## education

### **University of Washington, Seattle, USA**

#### **+ Bachelor of Fine Arts in Industrial Design** 2004-2008

An intensive program emphasizing the development of form that is derived from patterns of use, requirements for function, constraints imposed by industrial manufacturing and aesthetics driven by social context. Key aspects in this view on design are understanding the interactions between people and technology.

196 credits earned  
3.46 cumulative grade point average

### **University of Copenhagen, Copenhagen, Denmark**

#### **+ Copenhagen Classroom** Summer 2007

Taught on-site in historic Copenhagen, this interdisciplinary UW program explores Danish approaches to sustainable designs in various disciplines which are rooted in artful traditions of the 19th- and early 20th Centuries. Simultaneously, students participate in a 3-week intensive Danish language course.

12 credits earned  
3.90 cumulative grade point average
